## Patents Act 1977

**Examination Report under Section 18(3)** 

#### Basis of the examination

1. I have examined your application in the form that it was printed by WIPO when it was in the international phase. As a consequence of a lack of conciseness this report only relates to claims 1-49.

## Conciseness and plurality

- 2. There are an excessive number of independent claims which obscure the scope of protection being sought. As a consequence of this lack of conciseness I am not making any attempt to determine how many inventions are present but there would seem to be a prima facie case for plurality.
- 3. You will need to amend your claims, so that they relate to only one invention or inventive concept. You will also need to make consequential amendments to the description. You may wish to consider filing divisional applications. Any such applications should normally be filed no later than 3 months before the expiry of the period for putting the present application in order.

#### **Novelty**

4. The invention as defined in claims 1-49 is not new because it has already been disclosed in each of the following documents:

GB 2415454*	Α	(Watson) Note claims 1-49
GB 2391028*	Α	(Smith) Whole document
~~ ~~~~~		Of-AIf-\ Whale doormont

GB 2382832* A (Metcalfe) Whole document, noting claim 7

US 2002/0060079 A1 (Patterson) Whole document

- 5. No amendment of your claims will be needed in respect of the document marked * if you can show that the priority date of your invention is not later than the priority date of the relevant disclosure in that document.
- 6. Document '454 would seem to completely anticipate the claims and the remaining documents all appear to show apparatus for plastically deforming and cutting tubulars.
